

In today's business climate, companies able to make quick, sound business decisions are companies that succeed. The ability to make these strategic decisions requires timely, fact-based information.

Too many companies—including smaller ones—rely on a dizzying array of non-integrated legacy systems, desktops, servers and intranets. It's difficult to collect data from all of these sources to gain a clear picture of the organization. Company leaders and frontline employees alike require quick access to information to get the job done whether that means making strategic business decisions or simply answering customer questions.

There's a better way. It's called **Business Intelligence & Data Warehouse (BI & DW) Jumpstart with InfoSphere Balanced Warehouse.**

Xtivia's BI & DW JumpStart is designed to help your business:

- **Enable users to analyze and report on organization-wide information:** The solution supports flexible, unconstrained database connectivity and can deliver complex information to users in intuitively formatted reports. Automated wizards and reusable templates make quick work of reporting.
- **Improve productivity by delivering right-time information:** JumpStart provides specific information to select users via right-time or scheduled reports. You can also personalize reports based on specific business needs.
- **Collaborate:** Simplify collaboration by effectively sharing information.
- **Manage infrastructure:** Deploy BI on a proven, scalable, integrated, and easy-to-manage platform using Xtivia's industry leading capabilities.
- **Keep implementation costs low:** Using Xtivia's services and IBM products you can consolidate business data, reporting, and analytical tools without paying for separate products.

A Complete Solution

If you need long-lasting business intelligence in your organization, you need Xtivia's BI & DW JumpStart with InfoSphere Balanced Warehouse. Here's why:

- InfoSphere Balanced Warehouse leverages the capabilities in DB2 Warehouse 9.5, providing a complete data warehousing solution for your business in a pretested,scalable and fully-integrated software and hardware environment.
- The C-Class solutions have been pre-configured and pretested with hardware and software optimized to work together. And with a clear, defined upgrade path for future expansion, the C-Class solutions can grow as your business grows.
- You can create customized views and rich visualizations that communicate information graphically, making it easier to gain knowledge and insight.
- You'll have the ability to integrate and analyze data from multiple sources.
- You can develop more extensive and complex analytical models.
- You'll be able to create infrastructure to build reports—both traditional and interactive.

What We Do

Assess your BI Readiness, create a BI & DW solution blueprint using IBM InfoSphere Balanced Warehouse technology, and implement the solution with ongoing support using VDBA services

What You Get

A complete and accurate assessment of your readiness, the design and architecture that meets your needs, and comprehensive BI & DW implementation services using IBM InfoSphere Balanced Warehouse hardware and software, preconfigured, balanced and ready to use

What You Save

Time, money and headaches

What You Achieve

Fewer risks, maximized ROI, improved productivity, and shortened time to market

Xtivia's team of data warehouse specialists have helped clients of all sizes that were faced with finding qualified resources in the areas of data warehouse administration, management, performance tuning, development and maintenance services. Xtivia, an industry leader, has been successfully providing data warehouse consulting services to clients of all sizes for several years, both domestically and abroad.

Program Benefits

A winning combination: InfoSphere Balanced Warehouse and Xtivia's Skilled Team

By using the BI & DW jumpstart program, you can:

- Leverage strengths
- Manage risks
- Launch initiatives to improve business processes
- Develop competencies in embedding BI into core processes
- Manage the process of capturing business value as each BI initiative is deployed

Increase the Value of Your Business Intelligence

Make informed decisions, lower costs, and realize results—faster.

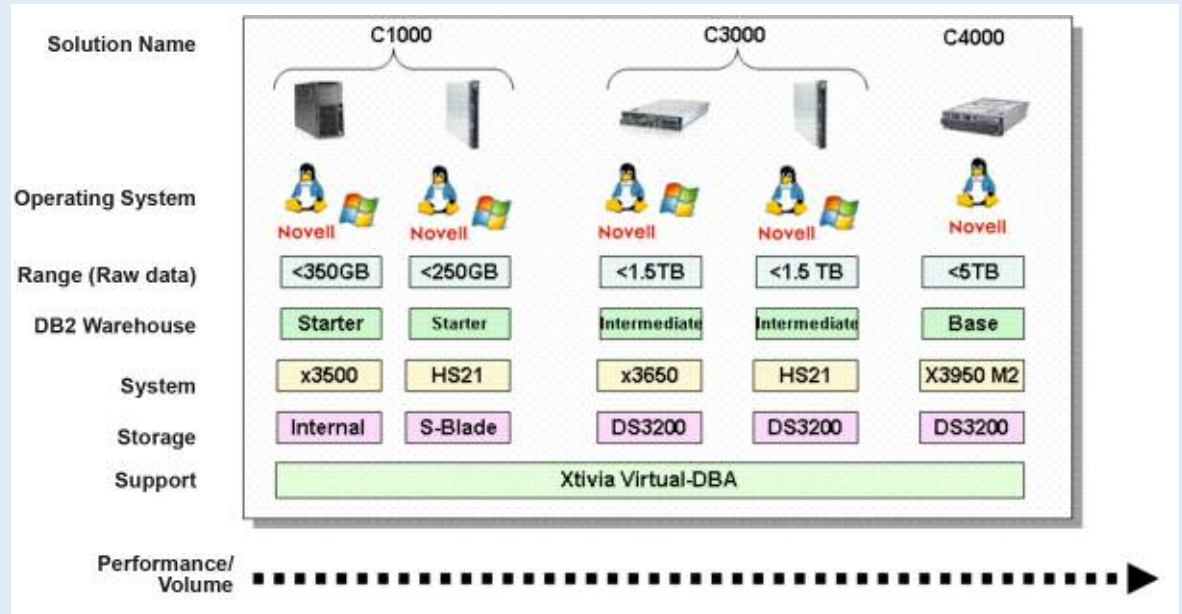

Deploying a traditional data warehouse is often complex, time consuming, and error-prone. The project can take months of planning and weeks of implementation. You can shave time and eliminate errors with the highly integrated and pre-configured IBM Balanced Warehouse C-Class solutions and Xtivia services deployment.

Our highly skilled team can quickly deploy your C-Class solution. The C-Class solutions are easy to use and they'll begin adding value to your business right away. And if that isn't enough, the complete solutions are priced right, with scalable sizing for hardware and software and services that are just right for your business needs.

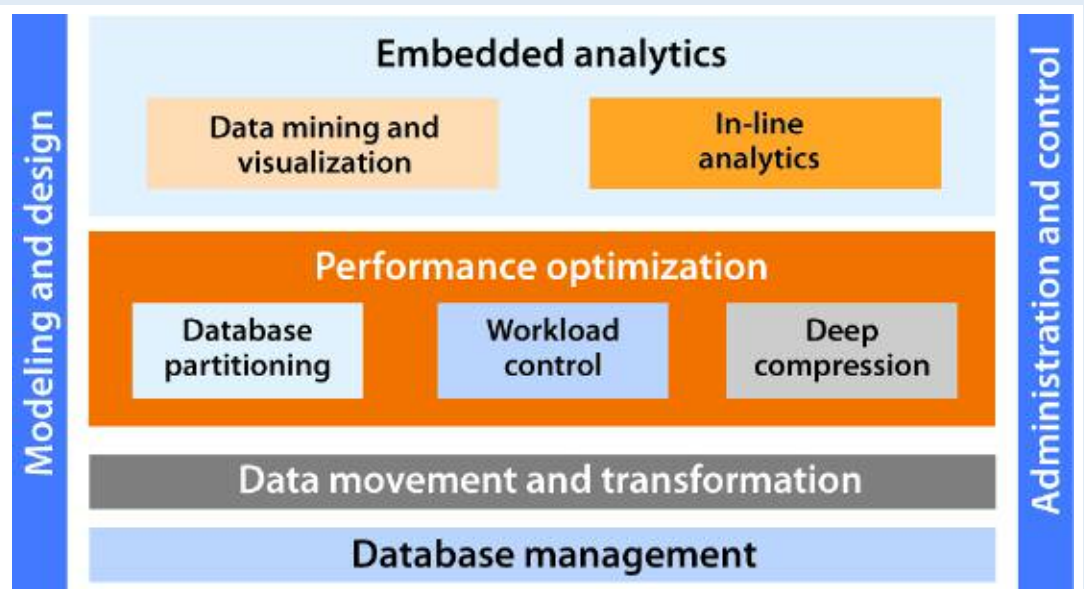

IBM Balanced Warehouse & Xtivia is the right choice whether you are planning a new data warehousing project or replacing existing data warehouses to gain insight into your data.
