

Xtivia's Onsite Training Options

Technology Training You Can Use

XTIVIA

Overview

You need to:

- Maintain your competitive edge by helping your employees' keep their technical skills sharp.
- Leverage the benefits of your significant technical investments.
- Quickly assimilate new technologies.
- Reduce operating errors.
- Retain valued employees.

Why Onsite Training Works:

- Technical experts focus specifically on your implementation and development project.
- It saves money by training multiple employees simultaneously.
- It's less disruptive. Training is scheduled around your workload demands.
- There's minimal down time. Employees learn new implementations at your location and on your systems.

Why Xtivia:

- As your business partner, we are fully committed to your business success.
- Our expert trainers possess unsurpassed technical skills coupled with extensive business experience.
- Our configurable course work paired with hands-on exercises is a proven training delivery method.

Training That Meets Your Needs

You get the right course fit. Whether you need off-the-shelf or customized courses, we can deliver. We collaborate with you to determine your needs and deliver training that fits. In addition to our comprehensive instructor-led training, we also provide one-on-one mentoring. Extremely flexible in design, we'll work with you to determine the appropriate length, structure, and schedule.

Learning effectiveness is ensured. Each of our courses delivers specific skills by job role, so you'll get the exact results you want. Hands-on labs reinforce the materials discussed in lectures—maximizing your team's learning experience. And, Xtivia's experienced instructors pair comprehensive, hands-on technical skills with effective facilitation and coaching techniques.

You pay for what you need. For most courses, we offer two-tiered pricing: small group (up to 5 students) or standard group (up to 10 students). For greater cost savings, you can sponsor a course at your location. We'll combine it with the appropriate amount of consultation for your specific needs. You simply invite other companies and advertise the training. And on top of the cost savings, the best practices and "real life stories" shared between the participating companies will enhance your learning experience. Additionally, as mentioned above, one-on-one mentoring can also be provided to meet your individual training needs in a cost-effective manner.
